DETAILED ACTION

Information Disclosure Statement

1. Acknowledgement is made of the Information Disclosure Statement filed July 1, 2002, which has been made record of and placed in the file.

Pre-Amendment

2. Acknowledgement is made of the Pre-Amendment filed March 21, 2002, which has been made record of and placed in the file.

Priority

3. Acknowledgement is made of the Priority filed March 21, 2002, which has been made record of and placed in the file.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 2855

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 6-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,647,775). Although the conflicting claims are not identical, they are not patentably distinct from each other because both teach a device for measuring at least one parameter of a flowing medium comprising a flow straightener and determining at least one parameter. '775 fails to explicitly teach the barrel ring. However, what is taught are the struts (12). It would have been obvious to one of ordinary skill in the art at the time that the invention was made to have used the struts of '775 in the flow meter of the instant application for the purpose of bring about an intentional rectification of the flow aspirated air (col. 3, lines 32-37, '775).
